

Open your heart to our community's homeless cats

A 501(c)3 nonprofit organization. We are dedicated to the care of feral cats, and members of our group work on a volunteer basis to feed, water, and provide medical care for hundreds of feral cats in Knoxville and surrounding areas. We participate in a trap/neuter/return program in an effort to control the feral cat population. The TNR program is where feral cats are humanely trapped by volunteers, taken to a clinic to be spayed or neutered and vaccinated, and returned to their colony where they are most comfortable. We are not an adoption agency nor do we take in unwanted pets. *Our organization only holds* adoption fairs in order to find homes for socialized kittens born into feral colonies and to re-home stray pets that are *abandoned in our colonies!* We are funded solely from donations and fundraisers with 100% of money raised going directly to controlling and maintaining the feral cat population.

What we can do: mentor you with your TNR (trap-neuter-release) project by teaching you how to use the traps (including care of the cats while in the traps) and loaning you traps to get the cats to the vet or a low cost spay/neuter clinic.

What we cannot do: remove feral cats from your neighborhood, place of business, etc., trap and transport the cats for you; loan traps for you to take cats to any animal service for euthanasia.

Trivet, the Newest FFF Sweetheart!

Trivet was born under a not very nice trailer. It was not very safe for babies! When she was only about 6 weeks old, her leg became entangled in debris under that trailer. The folks that lived there did the best they could for her, but she was seriously injured. Our super volunteer, Julia, swooped in and carried Trivet to safety. Once the TONS of fleas were killed, we went to the vet. X-rays showed that surprisingly only two toes were broken. We started a round of medication and hydrotherapy, and hoped for the best. We found a wonderful foster home for Trivet, and she was getting the best care possible. After a couple weeks, it became clear that the leg was more damaged than we had hoped. It had to be amputated. It was sure not the outcome we had all hoped for! But Trivet is now back with her foster mom and brother Milo. She is playing harder than she ever has, which shows that that leg was always holding her back. Trivet has nothing but a bright healthy future ahead!!

2014 Spay/Neuters

We have completed approximately 710 spay/neuters in 2014!!!!

We still have many calls and colonies that need TNR. Please, please consider donating your time to help with this. Every spay/neuter saves so many lives!!!

Please do not feel that you cannot help...we will walk with you every step of the way.
